PERSONAL PROJECTS

Hospital Management System :

- A Hospital Management System (HMS) is a comprehensive software solution designed to manage the day-to-day operations of a hospital.
- It integrates various functions such as patient registration, appointment scheduling, medical records management, billing, inventory management, and staff management.
- The system aims to streamline hospital processes, improve patient care, reduce administrative burden, and ensure efficient use of resources, ultimately enhancing the overall effectiveness and quality of healthcare services.

Neteflix Clone :

- User Authentication: Allow users to sign up, log in, and manage profiles.
- Movie/Show Display: Show lists of popular movies/shows with images, descriptions, etc.
- Search Functionality: Enable users to search for movies or TV shows.
- Watchlist: Allow users to add movies/shows to a personal watchlist.
- Responsive Design: Ensure the app is mobile-friendly.
